B·DEBATE International Center for Scientific Debate BARCELONA

IMPPC Institut de Medicina Predictiva i Personalitzada del Càncer

ANTONIS KIRMIZIS

SPEAKER AT:

BARCELONA CONFERENCES ON EPIGENETICS AND CANCER

CHALLENGES, OPPORTUNITIES AND CANCER

November, 21st and 22nd , 2013, Barcelona

Antonis Kirmizis, Assistant Professor at the Department of Biological Sciences, University of Cyprus, Nicosia, Cyprus

Antonis is an Assistant Professor at the Department of Biological Sciences at UCY since 2009. He received his Bachelors in Biology in 1999 at Lawrence University, USA. He then moved to the lab of Professor Peggy Farnham at University of Wisconsin-Madison for his PhD studies. There he defined the role of human polycomb protein SUZ12 in transcription and cancer. In 2004, he joined the lab of Professor Tony Kouzarides at Cambridge University as an EMBO and Marie Curie postdoctoral fellow where he characterised the role of histone arginine methylation in the regulation of gene expression. Recently, he has received a prestigious ERC starting grant from the EU in order to establish a research laboratory that aims to identify novel regulators of protein arginine methylation and their link to diseases such as cancer.

B·DEBATE IS AN INITIATIVE OF: biocat, "la Caixa" Foundation
