
TERESA MORENO

CV

PARTICIPANT AT:

URBAN AIR QUALITY: THE CHALLENGE OF NON-EXHAUST ROAD TRANSPORT EMISSIONS

July, 11th and 12th, 2013, Barcelona

Teresa Moreno, Researcher at the Institute of [Environmental Assessment and Water Research](#) (IDAEA) Spanish Research Council (CSIC), Barcelona, Spain

Teresa Moreno has a degree (1992) and an MSc (1993) in Geology from the Universidad Complutense of Madrid. She worked in the Spanish Geological Survey (1993-1995) before completing her PhD in Geology at the University of Cardiff (UK, 1999). Dr Moreno has completed post-doctoral studies in the University of Colgate (U.S. Fulbright, 2000), and branched into mineralogy and geochemistry of airborne particulate matter while a Research Associate at the University of Cardiff (2001-2004) working for the British Medical Council. Since 2004 she has brought her expertise on air pollution back to Spain, first as a Ramón & Cajal researcher and then as a tenured Junior Researcher in the IDÆA-CSIC institute where she was promoted to Senior Researcher in 2007. Her main research is based on the evaluation of levels, chemical composition and sources of atmospheric pollutants, especially those involving toxic metals. The practical applications of her research relate mainly to the impact of air pollutants on human health and the consequent need to devise contamination abatement strategies.
